## Knowledgeable

Typescript, Next.js Node js, Express, C/C++.

## Experience

*Self-Made Web Dev Eager to Launch Career*

**Two years** of solo web dev: I'm a self-taught web development I am building local websites from the ground up. JavaScript is my love, and I speak React fluently, including its vibrant ecosystem – Redux, React Query, React Router, you name it. My passion for fundamentals is insatiable, and I'm always pushing the pixels, devouring new challenges. Now, I'm ready to translate my solo journey into a collaborative masterpiece

*My power with JavaScript*

Before learning React I gave my best into mastering JavaScript, I honed my skills by building several raw projects using vanilla JavaScript and the **MVC** architecture

*React and it's Ecosystem*

I mastered myself with react eco-system, now my next dream is mastering **Next.js** and Back-end
